CS 3733 Operating Systems — Fall 2008 Assignment 6

Name _____

Consecutively number the pages and fill in the table of contents below.

Answer the questions on the back of this sheet.
You must answer the questions on the back to receive credit for this assignment.

If you think everything you did is correct, check here: ☐

Otherwise, give a **brief** description of what is working and what progress was made on each part that is not working. Include additional details with your answers to the questions on the back of this sheet.

1) Explain in a few sentences how you tested Part 1 and how you know it is working. Your answer should include information about how many servers were run, how you know that the compiles done on different machines are done in parallel, and how you know the servers you wrote are parallel servers. Also explain how you know it is handling directories correctly. Your server should be able to compile programs that are not in the directory from which the server was started. (If you did not get Part 1 working, explain in detail your progress on Part 1. If you do not do this, you will not receive partial credit for this part.)

2) Explain in a few sentences how you tested Part 2 and how you know it is working correctly. Include how you tested the program with Part 1 and what tests were run. (If you did not get Part 2 working, explain in detail your progress on Part 2. If you do not do this, you will not receive partial credit for this part.)
